## Lake Winnipeg: Inaction is not an option

Video

LWF

October 25, 2019

0

Lake Winnipeg defines our province and inspires our people – but the algae blooms are impossible to ignore.

Winnipeg's North End Water Pollution Control Centre (NEWPCC) is the single largest point source of phosphorus to Lake Winnipeg. Join us in advocating for the implementation of phosphorus-removal technology at this sewage treatment facility.

Inaction is not an option. There's too much at stake.
