

Ryan Kochie – ELMWOOD-EAST KILDONAN

Hi Alexis,

Thank you for reaching out. I agree excess pollution is an issue in our waterways and we need to commit to at the very minimum meeting the goals set forth by the province. This seems an "easy" solution as there is already a path forward, we just need to stick to it. So I can say yes I am committed to ensuring the project is completed on schedule. Yes I will approve funding necessary. I think overall we need to be stewards of the planet, within the city and the surrounding areas. We want to be able to visit nature and have it living in a healthy manner, just as we want to keep ourselves healthy. We have a responsibility to not just pollute our waterways or take it for granted all the clean water we do have in Canada. We need to protect the water cycle at all parts and if there are methods to make things cleaner they should be strived for. Algae blooms can threaten a lot of the wildlife in the lake, which is part of a bigger diverse circle that we do not want to break.

Thank You,

Ryan Kochie - Candidate for Elmwood - East Kildonan
