

Marcel Boille – ST. BONIFACE

Your questions are more like trick questions. Question 1.. I have never been on council and have no idea what surprises might be in store from our current administration, so will I ensure (big difference between support and ensuring)...absolutely not , because if I am elected I will still be only one vote. Having said that I certainly support the project being finished and operational on time.

Question 2... If I win I will be only one voice and cannot approve anything. I will however support approving the funding.

Question 3.... To be honest, the algal blooms being cause by the pollution the city causes in that lake affect the people around the lake a lot more than the city of Winnipeg Winnipeg does not draw it's water from that lake. The better question is what would Winnipegers say if Ontario started polluting the waters at Shoal lake, and how would it affect our quality of life. Same answer you have for lake Winnipeg and it's nearby population
