

Derrick Dujlovic – ST. VITAL

Hi Alexis, thanks for the email. In terms of the first 2 questions, my answer is yes to both. Lake health is very concerning to me, I see the effects (algae, fishing restrictions, beach conditions, etc) yearly. How it directly affects Winnipeg I'm still learning about, and would love more information on. I do know that Winnipeg wastewater has a direct effect on the lake (I think I read a report that it makes up 10% of excess phosphorus), but I am not completely read up on the subject.
