

YOUR DONATION MAKES A HEALTHY LAKE WINNIPEG POSSIBLE

When you get involved with Walk for Water, you're supporting freshwater solutions. Together, we are:

Advocating for evidence-based decisions – LWF works to influence policy, encourage action and hold governments accountable. Most recently we have been advocating for phosphorus compliance at Winnipeg's north end sewage treatment plant and renewed federal investment in phosphorus-reduction initiatives.

Monitoring our waterways – LWF coordinates the Lake Winnipeg Community-Based Monitoring Network, which is generating vital water-quality data to identify phosphorus hotspots and target action. Thanks to the efforts of citizen scientists, we currently monitor 119 sampling sites across Manitoba and beyond!

Amplifying Indigenous voices – LWF works in partnership with the Lake Winnipeg Indigenous Collective. We are actively practising reconciliation by respecting Indigenous knowledge and affirming Indigenous rights.

Now more than ever, your support matters. Thank you for joining us as we work together to protect our shared waters, now and for future generations.
